DETAILED ACTION

The final office action mailed 11/24/03 has been withdrawn. An office action on the merits is presented below.

Response to Amendment

Examiner acknowledges response by applicant's representative received 5/19/04.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-3 & 21 rejected under 35 U.S.C. 102(b) as being anticipated by

Hoyle's Modern Encyclopedia of Card Games.

Hoyle discloses on pages 338-339 the game of Klondike.

Regarding claim 1

Hoyle teaches a method of playing a solitaire game played with conventional playing cards; a set of game pieces (cards) grouped into at least four groups (clubs, hearts, diamonds and spades), a second means of ordering the game pieces (cards) in each group (2 through Ace) and a third means of grouping the game pieces (cards) into two independent groups (red and black cards); distributing the game pieces (cards) into a reserve area (starting area), a field area (area of game play) and a stock area (area for the pack of cards being used); moving the game pieces (cards) from the stock and reserve area into the field area such that the game pieces (cards) are ordered—consistent with the game of solitaire and moving the game pieces (cards) from the field area and stock area to the home area (area where the completes sets are placed).

Regarding claim 2

Hoyle teaches groups with an equal number of game pieces (2 through Ace of each group - clubs, diamonds, spades and hearts).

Regarding claim 3

Hoyle teaches second means in each group ordered (2 through Ace).

Regarding claim 21

Hoyle teaches a means of resolving blocked or deadlocked situations (see page 338, last paragraph and page 339 first paragraph).

2. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hoyle's Modern Encyclopedia of Card Games.

Regarding claim 4

Hoyle teaches groups of the third means having equal numbers 26 red and 26 black cards).

Hoyle fails to explicitly teach that a board is provided in his game. It is however inherent in the game of Klondike solitaire that it is played on a surface which is adopted as the board of play. It would be obvious to use the surface upon which the game is played as the game board of play in this game.

Alternatively:

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hoyle's Modern Encyclopedia of Card Games in view of Chernowski, Jr.

Hoyle discloses on pages 338-339 the game of Klondike.

Regarding claim 4

Hoyle teaches groups of the third means having equal numbers 26 red and 26 black cards).

Hoyle fails to explicitly teach that a board is provided in his game.

Chernowski, Jr. discloses Card Game components and Method of Play.

Chernowski, Jr. teaches a game board with includes a reserve are (a draw pile), a field area (memory area), a home are (program card area) and a stock are (storage area) – see figure 1 & abstract.

It would have been obvious to include the game board of Chernowski, Jr. with the Klondike Solitaire game disclosed by Hoyle for a more structured game play area.

Allowable Subject Matter

Claims 5-10 & 11-17 are allowed.

The following is an examiner's statement of reasons for allowance:

Patentability has been found because the prior art fails to suggest or show the combination as set forth in the independent claims 5 including 'at least one strategy piece for use with the plurality of game pieces to indicate whether an individual game piece is needed;' Further, the prior art fails to suggest or show the combination as set forth in the independent claim 11 including applicant's amendment to include six groups as opposed to four. These requirement are not seen or fairly suggested by the prior art of record.

Response to Arguments

Applicant's arguments, see page 8, second paragraph, filed 5/19/04, with respect to claims 11, 13, 15 & 17 have been fully considered and are persuasive. The final office action of 11/24/03 has been withdrawn.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and are cited to show the state of art with respect to features of the claimed invention.
